## ALLOCATION

*The Secure Balanced Fund is a sub fund of the Bahamas Opportunities umbrella investment fund, which began in November 2012. Performance shown is for Series 1, or retail, shares, which may differ from other Series offered in the fund. The asset allocation shown is subject to change without notice and at the discretion of the investment manager, subject to the restrictions outlined in the fund's offering documents. Past performance doesn't guarantee future success.*

## Uncertain Outlook for 2022

The Fund's performance versus the benchmark has been strong since inception. During the first quarter and year-to-date, the fund has returned 0.48% and 9.66% vs the benchmark which returned 0.68% and 8.08%. Over the past 3 years, the Fund has averaged 7.16% per annum versus 3.40% for the benchmark.

The Fund's outperformance is due to the tactical asset allocation decisions. In 2022 the Fund overweighted equities with a focus on companies we expected to benefit from the Covid-19 pandemic.

Currently 51.3% of the Fund's portfolio is invested in equities, with the balance invested in fixed income. The target allocation is 40% equities and 60% fixed income, but over the last 15 months no attractive new fixed income securities have come to market, so cash was invested in undervalued equities.

Over time the Fund will rebalance its asset allocation to the target 40/60 split, but the timing of this will depend on attractive new fixed income securities coming to market.

The Fund's largest sector exposure is the financial services sector, with 17.4% of the total portfolio invested local banks. After taking significant loan loss provisions, banks realized a strong comeback with high proportion of provisions being written back.

BISX index was slightly down in Q1, with First Caribbean Int'l Bank (CIB) leading the way with a 8.33% gain.

Investment opportunities in look fixed income remain limited, but several local stocks remain attractive investments. These stocks are trading at reasonable multiples and offer attractive dividend yields in the current low interest rate environment.
