Focus on Fundamentals in 2020

According to Morgan Stanley we should expect a modest recovery in the global economy in 2020. This view is predicated on the trade and monetary policies of the key economic players.

Renewed trade talks between the USA and China have "staved off further tariff increases." If the announced "phase one" deal is signed, this would reduce the risk of further tariff increases.

Central banks have picked up the pace of easing in the third quarter of 2019 and over the last year, 20 central banks have eased monetary policy. Morgan Stanley expects additional easing in 2020.

They also note that this is the first time on seven quarters that both trade tensions and monetary policy are easing at the same time.
